We’d like to finish what we started! Prior to the shutdown due to Covid-19, ZPSD facilitated in-person discussions with a variety of stakeholder groups to better understand the knowledge, skills, values, and cultural/linguistic competencies high school students should have mastered by the time they graduate in order to succeed in college, career, and life. Our goal is to help ZPSD make plans regarding policy and practice, and develop local partnerships in an effort to:

➔ Better align services throughout the school district
➔ Deliver content learning with a Zuni perspective
➔ Ensure that students are not defined solely by a test score
➔ Provide a cornerstone for backward planning

During the shutdown, we have been able to hold some more of these discussions virtually, but Covid-19 related restrictions will prevent us from reaching everyone so we are asking for community input through a survey. If you have not had the opportunity to participate in any of the focus groups (in-person or virtually) and have not already completed it, please complete the survey today.
