Don’t try to steer the river.

Deepak Chopra

Dear TPES Families,

It’s been a memorable year that simply could not have been possible without the collaboration between our teachers, school staff, students and families! While the current that is created by a global pandemic is fierce, we have tried to remain constant in the lives of our students and families.

I am certain that we have done our best to provide a quality educational experience worthy of our kids. I also believe that as school fully reopens in the fall, you will still see technology used in innovative ways to serve children and community. In addition, we know that good teaching - which includes building relationships; creating safe learning environments; maintaining student engagement; checking for understanding; providing feedback; and building lessons and units that are both standards-based and differentiated to meet students’ needs - can extend beyond a school campus and into students’ homes, too.

In the midst of the past sixteen months, we have also strengthened our organizational structures on campus, increased campus safety, and maintained our inclusive orientation toward tolerance and diversity. In 2021-2022, you can expect a flourishing of instructional and enrichment programs and activities as our energy and resources can now be redirected.

Over the summer, I will be hosting a New Family Information Session in July, date TBD. I will be sending more information and a Zoom link as soon as they are available. The last day to drop by our school office is Friday, June 18, and we will reopen the week of August 16.

In August, I will also be hosting Coffee Chats with the Principal to provide information about our safety protocols and other Back-to-School updates. Classroom assignments will be announced in the days before the start of the new school year. Remember, the first day of school is Monday, August 30!

Enjoy summer, and see you in August!
